

753 room air temperature sensor

Overview

Attractively styled wall mounted housing designed for even air flow around the sensor for optimal time response.

Unique housing design reduces the effects of self-heating created by the transmitter circuitry.

Ideal for remote sensing when used in conjunction with optional temperature transmitter

Technical specification

| Feature | Description |
|-------------------------------|--|
| Element type | Standard platinum, 100 ohms @ 0C (32F), .00385, TCR, with optional Pt1000 and 10K thermistor |
| Accuracy | Standard DIN-B |
| Termination housing | Standard galvanized steel utility box, with optional NEMA4 steel box available |
| Sensor sheath length | Standard 2 to 18 inches |
| Maximum operating temperature | 65°C (150°F) |
| Sensor lead wire | Three 24 AWG Teflon insulated |
| Insulation resistance | Greater than 100 Megohms @ 100VDC @ 21C (70F) |
| Accessory | 4500H transmitter (0502-157-0003) |

About Ultra Energy

Organizations working with nuclear and industrial technologies must deliver reliable production at the same time as safeguarding people, the environment and infrastructure. We develop and manufacture measurement and control solutions that give our customers complete, long-term control over systems operating in harsh environments, helping them operate safely and increasing the value derived from their investments over their total lifespan.

Part of Ultra Group, a global electronics company, Ultra Energy has worked with nuclear and industrial customers for over 60 years. We support customers across the world from facilities located in the US and UK. Our solutions are embedded in strategic national infrastructure and our people are active partners in customer programs that are focused on delivering advanced future nuclear and industrial capabilities.
