

3304 stick on temperature sensor

Overview

- Self-adhesive surface pad
- Quick and simple installation
- Flexible, conforms to curved surfaces
- Available in RTD or thermocouple
- Teflon insulated leadwire
- Suitable for temperatures to 500 °F
- ¾ custom designs available
- Other surface and embedded sensors available

Technical specification

Feature	Description
Element type	Standard platinum, 100 ohms @ 0C (32F), .00385 TCR, with optional Pt R0 and TCRs available
Accuracy	Standard DIN-B, with DIN-A, and others available on request
Construction	Standard 500°F service temperature, with option of 900°F
Lead wire configuration	Standard 3 Wire, with option of 2 wire
Lead wire length	Standard 24", with custom length available
Lead wire protection	Optional: stainless steel overbraid, stainless steel armor
Connections	Options of standard and miniature sizes, standard and high temperature ratings
Insulation resistance	Greater than 100 Megohms @ 100VDC @ 21C (70F)

About Curtiss-Wright

Curtiss-Wright Round Rock and Wimborne have worked with nuclear and industrial customers for over 60 years. We support customers across the world from facilities located in the US and UK. Our solutions are embedded in strategic national infrastructure and our people are active partners in customer programs that are focused on delivering advanced future nuclear and industrial capabilities.

Curtiss-Wright Corporation (NYSE: CW) is a global integrated business that provides highly engineered products, solutions and services mainly to Aerospace & Defense markets, as well as critical technologies in demanding commercial power, process and industrial markets. We leverage a workforce of approximately 8,600 highly skilled employees who develop, design and build what we believe are the best engineered solutions to the markets we serve. Building on the heritage of Glenn Curtiss and the Wright brothers, Curtiss-Wright has a long tradition of providing innovative solutions through trusted customer relationships.
